

Grad Portrait Time Is Here!!

With the ongoing COVID-19 pandemic, Smart Photography is aware of the significant challenges and apprehension that each of us is experiencing. We recognize the need to adapt to keep students, families, teachers, and schools safe. We have made several changes to our processes through experience; and will adapt further should we receive updated government protocols and requirements.

The Photographers will do their very best to be creative and come up with great poses and shots. You can help by being engaged, enthusiastic, and willing to be a little creative. The objective of course, is to ensure you have some fantastic Grad Portraits to commemorate the amazing person you are at this particular time in your young life!

- Full and strict social distancing will be adhered to and there will be absolutely no contact between Grad and Photographer. Everyone is encouraged to use hand sanitizer at every opportunity
- Photographer will always be masked. Grad should be always masked until such time the actual portrait session begins
- There will be no on-site proofs printed. All shots are in front of a green screen – Then you will have a variety of backgrounds to choose from when you wish to order your portraits
- There will be only one prop provided by Smart Photography: A Posing Stool. Each Grad shoot will be approximately 20 minutes and the stool will be sanitized between each grad appointment – The school may wish to enact additional cleaning protocols should it be deemed necessary
- If you wish to have flowers, please bring some with you as sharing is not allowed. We recommend roses of course
- **It is highly recommended that you bring some props that are particularly significant to you. Anything from musical instruments, artwork, wood working projects, dance gear, sports equipment etc. etc.**
- Please note the options particular to your school regarding the necessary gowns, hats, and sashes

Most Important: Bring Your Own Unique Personality & Enthusiasm!!
